

KINDERFIELD  
SCHOOL

### GENERAL REMARK

Dhiajeng has done her 1st term in this academic year. We are proud of her showing a nice adjustment with the offline class in Kindergarten B Level, after having virtual class in the previous level. She adjusts well with the routine and academically. She works well in all main subjects (math, literacy, Bahasa Indonesia). She reads more independently, yet still needs to blending the letter sound first. She identifies the letter sound and beginning blend sound in segmenting activity to write the words. Even so in Bahasa Indonesia sessions. She is able to retell the story that we read, recognizing the characters of the story which assumes that she has comprehended the story. She has a good understanding of all math concepts that we learned in this term, like simple addition, tens and units and also patterning concepts. We are pleased to see her enthusiasm with any art activities, such as art and craft or drawing sessions. Dhiajeng's gross motor and fine motor skills are developing. Her letter and number's form are getting proportional and she is able to work with cut, paste and coloring activity. She also follows the physical exercise well. Keep up the good work Dhiajeng! We also appreciate her willingness to speak in English consistently in the class, yet sometimes, she mixes up with Bahasa Indonesia. In addition, she is adjusting to her social life at school. She gets along with her classmates, especially with the girl.
